

“This initial historical analysis was assembled as a chronological chart and took months to accomplish. It is by no means complete. Resting on the known fact that the universe is stranger than you think it is, extreme flexibility was allowed relative to the entries in the chronology, sometimes reaching into the fringe. Of course, that’s where all the fun is. Whether you realize it or not, experience means knowing the unknown, even if it might seem ridiculous to the logical or linear mind, very strange facts have been known to come together in strange ways. They always do. When you examine the chronology, which was for me an organizational research tool, keep that in mind. I decided to include it in the book because I thought you might somehow find it useful in your own examination. Don’t get into a state because you feel I “left something out” or “didn’t include something else” or “shouldn’t have included this.” I did it for me, remember? Items are there because of informational relationships within the overall paradigm under examination. Names are not changed to unprotect the ignorant dullards who decided to try and run the show. Silly rabbit. Kids need love, not psychotherapy and psycho-cybernetic control. I trust you will find the following to be of use in your overall investigations. “(Valdamar Valerion)

1350 Renaissance Period, with its emphasis on freedom of the human spirit, replaces oligarchic control structures in Europe. It produces individualism that is immediately expressed as republican nationalism, dedicated to ending all hereditary control and dictatorship over the lives of people. The Renaissance Period becomes deconstructed again by the old families in

Europe. England eventually becomes the source of the movement to destroy nationalism (initially through conquest and establishment of the British Empire) and individualism, expressed in the Communist movement. Eventually, two world wars would be planned to restore rule by the oligarchy.

1400 European power centers coalesce into two camps: the Ghibellines, who supported the Emperors Hohenstaufen family, and the Guelphs, from Welf, the German prince who competed with Frederick for control of the Holy Roman Empire. The Pope allied himself with the Guelphs. All modern history stems directly from the struggle between these two powers. The Guelphs are also called the Neri, Black Guelphs, or Black Nobility, and supported William of Orange in his seizure of the throne of England, which eventually resulted in the formation of the Bank of England and the East India Company, which would rule the world from the 17th century. All coup d'états, revolutions and wars in the 19th and 20th centuries are centered in the battle of the Guelphs to hold and enhance their power, which is now the New World Order. The power of the Guelphs would extend through the Italian financial centers to the north of France in Lombardy (all Italian bankers were referred to as "Lombards." Lombard in German means "deposit bank," and the Lombards were bankers to the entire Medieval world. They would later transfer operations north to Hamburg, then to Amsterdam, and finally to London. The Guelphs would start the slave trade to the colonies. The Guelphs, in order to aid their control of finance and politics, would perpetuate Gnostic cults which eventually developed into the Rosicrucians, Unitarians, Fabian Society and the World Council of Churches. The East India company, together with John Stuart Mill, would finance the University of London. A friend of Mill, George Grote, would give the University of London £6000 to study "mental health," which began the worldwide "mental health" movement.

Weishaupt and others desired to attach themselves to Masonic lodges in Europe and America. In 1780, Weishaupt recruits Adolf Francis (Baron Knigge), which allowed the hierarchical structure of the Order to expand to completion. Weishaupt sought absolute obedience to him

and other influential members of the order, and worked for the overthrow of church and state authorities who were seen as blocks to Illuminati progress. Knigge completes the system of initiation, and membership swells to 300. Competition arises between Weishaupt and Knigge.

resurfaced as an organization called the German Union, which played a role in creating the French Revolution in 1789. This thesis is later discussed in 1918 with Stauffer's New England and the Bavarian Illuminati. The Humboldt brothers, Stein and others divide German society into three distinct groups: (1) those who will be policy makers who are taught to think (.5%), (2) those who will be engineers, lawyers, doctors who are taught to partially think (5.5%) and (3) the children of the masses (94%), who were to learn obedience and how to follow orders. The school of the masses (volkschulen) divided whole ideas into subjects which did not exist previously. The result was that people would (1) think what someone else told them to think about, (2) when to think it, (3) how long to think about it, (4) when to stop thinking about it, and (5) when to think of something else. This way, no one in the masses would know anything that's really going on. (Although brilliant, the system is inherently negative in nature - it would lead eventually to German mind control paradigms in the late 19th and 20th century. The system also weakens or breaks the link between the child and the capacity to read (cross-assimilation creating whole ideas) by replacing the alphabet system of teaching reading with a system of teaching sounds, (breaking into smaller units). The same paradigm relative to reading is currently injected into U.S. Society by the Peabody Foundation, who imposed a northern system of schooling on the U.S. South between 1865 and 1918. The system in the northern U.S. is the Prussian system. Over 48% of the soldiers in the American revolution against the British, on both the American and British sides, were Prussian (German) mercenaries.

Western and European science focus on the conditioning stimuli. Soviet scientists focus on the aspect of external environment. Both aspects would later blend in an overall mind control paradigm in the latter 20th century. Heavy research would be conducted in Germany, which later contributed to development of a mind control infrastructure in the U.S. based on a mechanistically-based synthetic environment tied to body consciousness, temporal structure, drugs, and electronics. Soviet contributions would add to the molding of the underlying psychological substructure. China would also adopt the paradigm as a basis for control of their vast population of 1 billion.

1927 John Watson has achieved an experimental basis for the behaviorist school of psychology with his experiments in "molding the infant mind." Using external stimuli combined with positive and negative reinforcement, Watson perfected a mechanistic method of mind control based on fear. Developments would wait for the introduction of operant conditioning by B.F. Skinner, whose first guinea pig was his own daughter—who would later commit suicide at the age of 21.

The principle that sustains compulsory vaccination is broad enough to cover cutting of the fallopian tubes... three generations of imbeciles is enough.” They then sterilized Carrie Buck. The crux of the matter is that Carrie Buck was not retarded, but just a little slow, based on environmental conditions. Her child grew to be an honor student.

1933 FDR passes Emergency Banking Relief Act (Mar 4th) of 1933 to illegally amend Trading With the Enemy Act of 1917. The action was illegal because the U.S. was no longer at war. The Banking Relief Act of 1933 creates a wedge whereby wartime powers are sanctioned for use in peacetime. The Banking Relief Act declared March 6, 1933, a Bank Holiday order which relieved U.S. banks from their contractual obligation to the people of the U.S. of redeeming their Federal Reserve Notes in Gold. The concept of the Federal Reserve note was, before this act, constituted a "warehouse receipt" for real Gold which the people had placed on deposit at banks. Furthermore, the parent Trading With The Enemy Act of 1917 excluded all citizens of the U.S. who conducted business wholly within the United States. The Banking Relief Act amends the TWE Act in such a way to now include all citizens of the U.S. from now on, equating the people of the U.S. as an enemy, and all legal and commercial intercourse became illegal. The only way to do business in the U.S. thereafter was to obtain permission from the state through getting a license. From this the Uniform Commercial Code would spring. Furthermore, the EBR Act created the whole paradigm of licenses, drivers license, etc. The government (Washington DC) in this way protects itself from the people (enemy).

From now on, people are forced to mortgage property. All debt cannot be “paid,” but only “discharged.” The people become captured chattel property of the U.S. to “secure the debt.” Former states become “political subdivisions” or occupied territories of the belligerent corporate United States. Americans are ordered to turn in their gold coins, bullion, other gold resources. During this period, over \$114 million in gold was taken from banks for export, and \$150 million in gold was withdrawn for hiding purposes. Gold at \$20.67/oz.

Grand Rapids was selected as the location for the experiment. The city commission approves a motion to fluoridate on July 31, and decide it is to begin in January 1945, despite the warning issued three months earlier by the American Dental Association. Grand Rapids becomes the first city in the United States to conduct this experiment. It was to serve as the test city to be compared against unfluoridated Muskegon for a period of ten years relative to tooth decay, at which time it would be determined whether or not fluoride was "safe and effective." Dr. H. Trendley Dean was put in charge of the project. The experiment was terminated early with the pronouncement that fluorides in public water supplies was "safe." See 1945.

The U.S. Public Health Service, then a division of the FSA, comes under the command of Ewing, and he begins to vigorously

promote fluoridation nationwide. Ref: May 25-27 Hearings before the Committee on Interstate and Foreign Commerce. A by-product of aluminum manufacture is toxic sodium fluoride. Ewing's public relations strategist for the fluoride campaign was the nephew of Sigmund Freud, Edward L. Bernays. The Himmler names Dr. Heinz Kammler (Lt. Gen. SS) the director of secret war production. V-2 rockets are launched on London. The SS demonstrates much interest in certain unusual weapons that promised certain victory.

1944 The Journal of the American Dental Association on October 1, 1944 warned that "We do

know that the use of drinking water containing as little as 1.2 to 3.0 ppm of fluorine will cause such developmental disturbances in bones as osteoporosis, and we cannot run the risk of producing such systemic disturbances in applying what at present is a doubtful procedure intended to prevent development of dental disfigurement in children. In the light of our present knowledge or lack of knowledge of the chemistry of the subject, the potentialities for harm far outweigh those for good.”

A large number of Germans involved in mind control work in the concentration camps are imported into the United States. One of the German imports would be a Hasidic Jew who represented the best of the Nazi mind control programming. He would be the one to develop the mind control operations for military intelligence in the United States, and is known by the pseudonym of cabalist Dr.Greenbaum. Imported also is the methodology for deliberately

Debt service in the U.S. to international banks would soar, while at the same time destroying the tax base of the country. (World Bank, IMF)

Eight infants had convulsions within 72 hours of the shot, 34 had convulsions within 28 days of the shot. British doctors denied a connection between the vaccine and the convulsions, declaring the tests a success and began administering it to all British children. Despite the Fact that none of the tests were conducted on children under 14 months old (newborns and babies), the United States holds the tests in evidence that the vaccine is safe for newborns as young as 6

weeks of age. The testing would continue until 1957.

One of the children became blind, deaf, spastic, and helpless after being given the Pertussis shot. Out of the 15 children, two died and nine suffered from damage to their nervous system. Sandler reveals that sugar and starches lower the blood sugar level, producing hypoglycemia, and that soda pop (recently introduced) contains phosphoric acid that absorbs phosphorus and sulfates in food before natural metabolism can get it to the nervous system, causing the nerve trunks to fail to function properly. Sandler says that dairy products and sugared soft drinks are aggravating the incidence of polio.

1948 Polio cases in North Carolina number 2,498.

1948 Louis Sauer makes an interesting observation at an AMA meeting where Pertussis vaccination was discussed. Louis Sauer points out that “the neurological damage caused by Pertussis vaccine is the same as the damage caused by Pertussis (whooping cough).” (Which is logical, because they use the bacteria in the vaccine). According to Sauer, “a customary prophylactic dose of Pertussis vaccine seems to illicit a chain of nervous system reactions and in some cases irreversible pathological changes in the brain. These findings resemble those encountered in cases of severe whooping cough (Pertussis).” In other words, the vaccine is causing the disease condition.

Thus, the U.S.PHS formed an alliance with medical trade unions and industry to promote the addition of toxic fluorides to the public water supplies. 1952 U.S. Representative Dr. A. L. Miller, Chairman of the Special Committee on Chemicals and Foods, stated, “I sometimes wonder if ALCOA Aluminum and its subsidiaries might not have a deep interest in getting rid of sodium fluoride, a toxic waste product of the aluminum industry. 1953 In the United States, Senator Charles Tobey begins a Senate investigation into the cancer industry. U.S. Justice Department attorney Ben Fitzgerald is hired as special counsel. Fitzgerald’s report concluded that “the AME, in direct collaboration with the National Cancer Institute and the Federal Drug Administration, entered into a conspiracy to suppress alternative, effective cancer treatments.” Said Fitzgerald, “if radiation, surgery and drugs are the complete answer, then the greatest hoax of the age is being perpetrated upon the people by the continued appeal for funds for further research.” Senator Tobey is dispatched with a convenient “heart attack,” as has happened to others who threaten the cancer industry. Tobey’s replacement, Senator John Bricker, orders Fitzgerald to stop the investigation. Fitzgerald refuses and is fired. The investigation is halted and buried.

Thomas Huxley. Aldous Huxley, author of Doors of Perception, had a personal paradigm which included the concepts of Dionysian “children of the sun” and an Illuminist-Osiris-Isis orientation. Aldous was also tutored by H.G. Wells, who was also in charge of British Foreign Intelligence in 1916.

One of the curious books written by Wells was *The Open Conspiracy: Blue Prints for a World Revolution*. Huxley's initiation into psychedelic substance was provided by Aleister Crowley. It is thought by some that the British push of psychedelic chemicals on the United States is reminiscent of the paradigm of opium in China.

Annell, a Swedish researcher, writes a major work on Pertussis which indicates that “pertussis vaccine may be associated with the most varying kinds of cerebral complications which may be cortical, subcortical, or peripheral.” Encephalitis after vaccination is known to produce the same range of disabilities and impairment. 1958 World literature now contains 107 cases of severe reaction to Pertussis vaccine (93 of those cases were in the U.S.). At the Fountain Hospital in London, Dr. J.M. Berg analyzed the 107 cases and found that 31 of them showed signs of permanent brain damage. Berg calls attention to the danger of mental retardation as an effect of the Pertussis vaccine and emphasizes that "any suggestion of a neurological reaction to a Pertussis vaccination should be an absolute contraindication to further inoculation." The United States medical establishment ignores and suppresses the data. American physicians maintain that the damage caused is small compared to "lack of 'serious' reactions in children vaccinated." No data has ever been found to justify a basis for this conclusion.

1958 In October 1958, Dr. J.F. Montague, a medical doctor, published material reflecting his growing concern over fluoridation in the Journal of the International College of Surgeons connecting the presence of fluorine in the human body to cancer. Also in 1958, an interesting piece of work was done by Dr. James Kerwin, a dentist, in which it was shown that the simultaneous presence of fluorine and strontium 90 in the human body may result in a greater accumulation of both substances in which compounds like strontium fluoride are formed. Because of the low solubility of these substances, the body has a very hard time getting rid of them. His report was published in Dental Digest in February 1958.

1958 McGill University in Montreal CIA-funded experiments with LSD. A 1986 study of CIA development of LSD notes that “nearly every drug that appeared on the black market in the 1960’s had been previously scrutinized, tested, and in some cases refined by CIA and U.S. Army scientists.” (“Acid Dreams: The CIA, LSD and the Sixties Rebellions,” by Lee and Shlain, New York, Grove City Press, 1986).

1959 A breakthrough in Artificial Intelligence occurs from Cornell psychologist Frank Rosenblatt, who designs a neural network called a “perceptron” that could be “trained” to perform simple classifications of visual patterns. It would have a great impact on the field of AI. Researchers turned their backs on conventional AI algorithms to build perceptrons and similar neural nets in an attempt to expand on pattern recognition capabilities. In the mid-1960’s other work would define what perceptrons could not do, when Minsky and Papert publish Perceptrons: An Introduction to Computational Geometry.

1959 In the report of the proceedings of the 3rd Medical-Dental Conference on the Evaluation of Fluoridation, held on March 7, 1959, in New York City, the committee concluded that “It is apparent that the practice of fluoridation is not the simple, trustworthy procedure that the promoting authorities have given the profession and the public to believe.” Added to the lack of control of fluorides at the consumers tap are these major uncertainties: the gross variation in individual water consumption, the varied intake of fluorides in food and the fluoride intake from atmospheric and occupational exposure. These unpredictable issues make meaningless any talk about “controlled individual fluorine intake.” Most, if not all of this research has been buried by the authorities, who maintain glibly that “fluoride compounds are safe in the water supply.”

Interestingly, Britain's trials on 50,000 British children were performed on children more than 14 months old. None of the children were newborns.

1959 Fluorides were used as an enzyme inhibitor in a study by J.D. Ebert that was published in 1959 on the metabolic pathways by which organs in an embryo are formed. In low concentrations, he found that sodium fluoride blocked almost completely the regions destined to form muscle, primarily affecting the heart muscle. In higher concentrations, it caused the entire embryo to disintegrate in a clear-cut pattern, starting with the heart-forming region.

1959 As early as 1959, the knowledge existed that the presence of fluoride in human bodies hastens the absorption of radioactive substances present in the environment. In a report to the Atomic Energy Commission's Division of Biology and Medicine entitled "The Metabolism of Alkaline Earth Metals by Bone" by F.W. Lengemann, professor of chemistry at the University of Tennessee on March 23, 1959, it was scientifically shown that the presence of fluorine and other environmental substances such as lead and cyanide in the human body increased the ratio of strontium 90 to calcium in bone.

It is interesting that. in the first three years of fluoridation, New Britain, Connecticut, experienced a 150% rise in still births.

1960 In 1960, the American Dental Association issued a pamphlet for public consumption called Fluoridation Facts: Answers to Criticisms of Fluoridation. In defense of the use of toxic fluoride compounds in public water supplies (which is a grievous crime against humanity, since it means mandated involuntary public medication), they used the logic that “people have been known to live to a ripe old age” in areas where the water supply is fluoridated. Unfortunately, they neglected to mention that the addition of fluoride to the water supply correlated directly with the number of still births, mongoloid children, brittle teeth, and enlarged dental root structures, adverse spinal conditions, osteomalacia (softening of the bones), and osteoporosis (abnormally porous and spaced structure inside bone) in the medicated population as opposed to control populations that were unmedicated.

1960 A study is done in Japan that involved examination of fluoride deposition in the fetuses of dogs. It was found that the quantity of deposited fluorine was especially large in bones, largest in the cranial bone as well as the lower leg bone. The quantity of fluorine deposition was parallel with the progression of the calcification. They also proved that the deposit of fluorine on teeth and bones starts through the placenta as early as the embryo period, and then takes place through the mother's milk through the infancy period, and through food, as well as directly through the inside of the oral cavity. As fluorine is a known active enzyme poison, it is known to affect cell division (mitotic) in the fetus, resulting in anatomical anomalies (teratism).

1961 Jim Jones migrates to Brazil, courtesy of the U.S. embassy, who supplies food and transportation. While in Brazil, Jones confides to local residents that he is working for Naval Intelligence. Jones was accompanied by Dan Mitrione, a lifetime friend of Jones who worked with the CIA providing interrogation and torture techniques to Third World police forces. After his trip, Jones returns to the U.S. and starts the Peoples Temple - what many consider to be a CIA medical and mind control experiment. Jones recruited poor and homeless. Jim Jones and the Peoples Temple were funded mainly through Lawrence Layton and his family. Layton was the chief of Chemical and Ecological Warfare Research at Dugway Proving Ground, which has been connected circumstantially to cattle mutilations, disease biowarfare and genetics experimentation. The fortune of Layton's wife came in part from I.G. Farben, the key Nazi cartel. Jonestown was built during the time of the CIA MKULTRA program, the target b population of which was coincidentally the same as Jonestown. Enough drugs were found to have drugged

200,000 people over a year. Jonestown held 1100 people. The drugs were all psychoactive mind control drugs. None of the victims showed cyanide poisoning. All bore needle marks, indicating that when the experiment got embarrassing, all of the people were murdered. BATCH CONSIGNMENT.

1961 In Great Britain, Dr. R.A.Holman of the Royal Institute of Pathology discussed fluoride poisoning in an article in the April 15, 1961 issue of the British Medical Journal. He noted that the long-term effects of sodium fluoride ingestion needed much more investigation, and continued, "Fluoride is a well-known inhibitor of several enzyme systems, and can form spectroscopically recognizable compounds with the enzyme catalase, resulting in its inhibition." Catalase poisoning has been linked with the development of viruses and the causation of a number of diseases, including cancer. Many observers have suggested that the agents (fluorides and other toxic environmental substances) which decrease the catalase the cells may predispose those cells to tumor formation. Voisin has said, "the method most likely to solve the problem of cancer is to ask why the cancer cell is lacking in catalase and try to prevent its impoverishment from taking place."

1961 Request goes in for production of the Iron Mountain Report on the Desirability of Peace. Public Law 87-297 passed (Arms Control Act), providing for gradual disarmament of the people of the United States over a period of years and creation of a UN Police Force. War is viewed as

the “basic social system,” within which others are secondary modes of organization, conflict or conspiracy. Peace would bring unrivaled social disruption, according to world planners. War is considered a necessary waste that operates outside the normal economic “supply and demand” system. It creates artificial demand and spurs technological advances. War=Nations. Peace = No Nations. The elimination of war requires elimination of Nation States. The basic authority of the modern state over its people resides in its war powers. (See FDR 1933). Substitutes for war: (1) Must be of equal magnitude as that of world war in terms of public perceptibility. (2) It must be credible and accepted by the vast majority. Since nations would disintegrate without perception of an external threat, “it is more probable that such a threat will have to be invented, rather than developed from unknown sources.” (Invented = Environmental pollution, “alien invasion,” “asteroids,” etc.). It must represent a threat to the survival of the species. According to the Report From Iron Mountain, “poisoning of the air, and of the principle sources of food and water supply, is already well advanced, and at first glance would seem promising in this respect. It will be a generation to a generation and a half before environmental pollution will be sufficiently menacing to offer a possible basis for a solution.” (1991).

1967 Report from Iron Mountain released by Dial Press. Re-establishment of slavery discussed

as possible aspect of world at peace under social control. The report proposes that war be replaced by a surrogate which must be wasteful and operate outside the normal supply-demand system. The surrogates on a social level must not be accessible to the whims of the people. Some of the social surrogates mentioned: complete government guaranteed health care for all citizens, a social welfare program, space research programs with unattainable targets, guaranteed annual income, threat of gross pollution as a principle threat to species survival, reintroduction of slavery through some form of compulsory service, addition of population control substances to water supplies and government-supplied antidote for producing sanctioned children. Another substitute for war is a Space Program with unattainable goals: "In the event some individual project succeeds, there would be no end of substitute problems" (Iron Mountain Report).

1969 By 1969, the fluoridated cities had an average cancer death rate of 225 per 100,000 people, while non-fluoridated cities had an average cancer death rate of 195 per 100,000. The data indicates a fluoride-linked increase of cancer of 10% in only 13-17 years. These figures were checked and confirmed in 1979 by the United States National Cancer Institute. The increase in cancer death observed in fluoridated cities occurred primarily in people ages 45 and over; this fact is explainable because both the immune system and the normal DNA repair process (the two major defense systems against cancer) decline with age.

1970 RAND Corporation publishes a report entitled "A Brief Survey of Literature Relating to Influence of Low Intensity Microwaves on Nervous Function." The author notes that the U.S. microwave guideline in effect for the public, 10,000 mw/cm², provide for non-thermal levels of microwaves which produce behavioral disturbances in humans. These disturbances include irritability, loss of memory, fatigue, headache, tremors, hallucination, autonomic nervous system disorders and disturbed sensory functioning. The report continues in discussion of several possible mechanisms which allow these effects.

1970 A companion paper, "A Direct Mechanism for the Direct Influence of Microwave Radiation on Neuroelectric Function," is also produced by R.J. MacGregor for the RAND Corporation. In the report, he notes that power densities of close to 100,000 mw/cm² can produce auditory hallucinations in a field that would be averaged as low intensity and non-thermal. According to MacGregor's model, this would produce a depolarization of brain tissue of 2.0-3.0 mV, where he concludes that neuroelectric effects should exhibit a maximum effect in the microwave range.

He predicts the “gradual appearance of a more controlled and directed society, dominated by an elite whose claim to political power would rest on superior scientific know-how.” This elite would “not hesitate to achieve its political ends by the latest modern techniques for influencing public behavior and keeping society under close surveillance and control.” Additionally, Brzezinski says that “Marxism represents a further vital and creative stage in the maturing of man’s universal vision.” He theorizes that the liberal democratic societies would support authoritarian forms of government if they were given a choice between a dictatorship and social/intellectual disorder.

Army counter-intelligence operative and ranking CIA official until his resignation in 1962, as saying “Oswald was programmed to kill like a medium at a séance, then the mechanism went on the blink, and he became a dangerous toy without direction.” Three weeks after the interview between MacDonald and Kimsey, Kimsey dies of a “heart attack.”

The National Cancer Institute attempts to refute the studies. Later in 1975, Yiamouyiannis joins with Dr. Dean Burk, chief chemist of the National Cancer Institute (1939-1974) in performing other studies which are then included in the Congressional Record by Congressman Delaney, who was the original author of the Delaney Amendment, which prohibited the addition of cancer-causing substances to food used for human consumption. Both reports confirmed the existence of a link between fluoridation and cancer. 1976 It was discovered that enkephelins operated within the nerve tracks that signal chronic pain to the brain, and that some enkephelin receptors were found positioned to direct nerve impulse traffic from one nerve to the next, along primary paths of perception, emotion and pain. Later in 1976, in Britain's National Institute for Medical Research, the peptide beta-endorphin was isolated from the pituitary of a monkey. It had an analgesic potency 100 times that of morphine and 40 times greater than enkephelins. Beta endorphins were split into Alpha

and Gamma, the difference being only one amino acid. While Gamma produced a sensitivity to pain, Alpha produced analgesia. It was then postulated that Beta endorphins could act like a switch to balance reaction to pain. Lower blood sugar regulates certain neurotransmitters and controls certain hormones, all leading to certain behavioral effects from speed-learning to flight-or-fight and pain suppression. So, schizophrenia at this time was diagnosed as typifying a de-activation of the beta endorphins. Beta endorphins have emerged as the most important element in the biochemistry of behavior. He who controls beta endorphins controls the mind.

In 65% of the cases referred to us, reactions followed "triple" vaccinations. The children in this group total 182 to date. All are severely brain damaged, some are paralyzed, and 5 have died during the past 18 months. Approximately 60% of reactions (major convulsions, collapse, screaming) happened within 3 days and all within 12 days."

1976 Unusually cold weather plagues the United States.

1976 George HW Bush becomes Director of the CIA, the enforcement arm of CFR.

1976 Dr. Robert Simpson of Rutgers University addresses science writers at a seminar of the American Cancer Society, pointing out, "...immunization programs against flu, measles, mumps, polio, etc. May actually be seeding humans with RNA to form latent proviruses in cells

throughout the body. These latent proviruses could be molecules in search of diseases, including rheumatoid arthritis, multiple sclerosis, systemic lupus erythematosus, Parkinson's disease, and perhaps cancer." According to Dr. Wendell Winters, a UCLA virologist who also attended the seminar, "immunizations may cause changes in the slow viruses and changes in the mechanism of DNA. This is being studied by Dr. Robert Hutchinson at the University of Tennessee."

1976 Dr. Jonas Salk, creator of the polio vaccine, says that analysis indicates that the live virus vaccine in use since the 1960's is the principle, if not sole cause of all polio cases since 1961.

1976 More than 500 people receiving flu vaccinations become paralyzed with Guillain-Barre Syndrome.

1976 Dr. D. W. Allman and co-workers from Indiana University School of Medicine feed animals 1 part-per-million (ppm) fluoride and notice the urinary levels and tissue levels of a substance called cyclic AMP (adenosine monophosphate) increased by more than 100%. They also found that in the presence of aluminum in a concentration as small as 20 parts per billion, fluoride is able to cause an even larger increase in cyclic AMP levels. Cyclic AMP inhibits the migration rate of white blood cells, as well as the ability of the white blood cell to destroy pathogenic organisms. Ref: Journal of Dental Research, Vol. 55, Sup B, p523, 1976, "Effect of Inorganic Fluoride Salts on Urine and Tissue Cyclic AMP Concentration in Vivo." (Note: It is no small accident that toothpaste tubes containing fluoride are often made of aluminum, nor is it an accident that aluminum cookware and fluoride use were injected into the population virtually simultaneously.)

1976 After declining steadily since 1922, cases of Pertussis (whooping cough) suddenly begin to rise significantly between 1976 and 1980, during the same time vaccination for Pertussis was increased. The number of reported cases has risen each year since 1977. Reasons are said to be "unclear" why school age children make up the bulk of the cases.

1977 William Jennings Bryan III, master hypnotherapist with CIA connections, is found dead in his hotel room in a Las Vegas hotel. The coroner states he died "of natural causes," even

before the autopsy is performed. Bryan is believed to have been involved in the hypnotic programming of Albert De Salvo (Boston Strangler), Sirhan Sirhan (before the attack which led to Robert Kennedy's death), James Earl Ray (jailed for the murder of Martin Luther King), and other significant figures in history.

1977 Ray Ravenhott, director of the population program for the U. S. Agency for International Development (AID), publically announces his agency's goal was to sterilize 25% of the females on the planet in order to "protect U. S. corporate interests from threat of revolutions spawned by chronic unemployment." Ref: St. Louis Post Dispatch "U. S. Goal: Sterilize Millions of World's Women," also in Womanews (New York) in article by G. Esterman entitled "The Master Plan."

1977 The Congressional Subcommittee on Intergovernmental Relations convenes two full Congressional Hearings on the subject of fluorides. During the hearing, it was proven that (1) The "scientific efforts" of those promoting fluoridation were fraudulent, and (2) That other existing studies proved beyond a doubt that approximately 10,000 excess cancer deaths per year could be attributed to fluoridation in the United States.

1977 Congressional representative L. H. Fountain, chairman of the 1977 Sub-Committee Hearings on Fluoride, states that "the carcinogenic nature of fluoride remains unanswered" and orders the U. S. Public Health Service (U.S.PHS - who is in on the fluoride conspiracy anyway) "to conduct animal studies to see if fluoride causes cancer." Dr. Herman Kraybill, from the National Cancer Institute (who in 1972 had been chosen by NCI to write a memo saying that fluorides do not cause cancer) was placed in charge of these studies. Kraybill boldly states, "this will be the final study to confirm negativity of fluoride ions in carcinogenesis." He cites 13 studies having nothing to do with the subject of fluorides and cancer in order to support his claim that "no link between fluorides and cancer existed." (NCI Director Dr. Arthur Upton later admitted the 13 studies had nothing to do with the subject of the study). (See 1982, 1985,1988)

1977 A Blue Ribbon Panel is convened to investigate the reason for the drop in the general IQ of the United States. Seventy-nine theories were advanced, but none of them satisfactorily explained the drop in mental capacity of the U. S. population. The idea that vaccines could be part of the problem was not brought up. Y. L. Warten, 1977. (The Prussian education system is also part of the problem, for those volkschuelen).

1977 The British government is pressured by the publicity following the new data about Pertussis and DPT vaccinations.

1977 The University of Glasgow in Scotland, Department of Community Medicine, Dr. Gordon Stuart, publishes a study analyzing 160 cases of adverse reaction and neurotoxicity following DPT vaccination. In 65 of those cases, reactions to DPT shots included convulsions, hyperactivity, and severe mental defect. In a stern statement, Stuart says, "it seems likely that most adverse reactions are unreported and/ or overlooked."

1977 The British government conducts the National Childhood Encephalopathy Study (NCES) which tests the connection between vaccinations and neurological disease.

1977 Russia deployed charged particle beam weapon in space, upsetting U. S. control of planetary space. Cosmos 929 destroys U. S. satellite.

1977 In 1977, Congressional Hearings were held in which Dr. Yiamouyiannis and Dr. Burk were

able to show that the increase in deaths were due to water fluoridation. At the conclusion of the hearings, Representative Fountain and his committee instructed the United States Public Health Service (well known by now for questionable and dangerous medical advisory practices which benefit the medical and pharmaceutical industries) to conduct animal studies to “determine whether or not fluoride causes cancer.” As a result, the U.S.PHS retained Battelle Memorial Institute (also well known for NWO technical activities and is considered by many to be part of the cancer cover-up) to perform a study on mice and rats - unfortunately rodent physiology differs considerably from humans, making the transfer of data between species relatively meaningless. (See 1989, Battelle Study).

1977 Project Dreamscan comes on line with the ability to enter a persons dream state and cause death. Managed by the NSA, the project had assassination as its eventual aim. Project allegedly halted by Carter.

1977 U. S. sells Soviets a supermagnet which they then use for weather modification.

1977 Timothy Leary publishes “Exo-Psychology,” in which he confides “there are two aspects of this social conditioning regime which are not stressed by Skinner. To make it work, the government psychologists must have total control over the citizenry, and there must be total secrecy and censorship. One dissident, freedom-oriented psychologist can totally disrupt a psychological fascism by public exposure. Psychological control techniques cannot be employed in a democracy where minority groups can campaign against and publically discuss the techniques being used. Thus, the proposals of B. F. Skinner cannot be implemented except in a state where the government has total control of communication.”

The process involves beaming information directly to nerve cells for “enhancement of mental and physical performance.” MRU is a spin-off from Systems Consultants, Inc. (See 1966).

1981 Drs. Susheela and Sharma and coworkers from the India Institute of Medical Sciences find that fluoride exposure disrupts the synthesis of collagen in the body and leads to the breakdown of collagen in bone, tendon, muscle, skin cartilage, lung, kidney, and trachea. It appears that fluoride disruption of collagen synthesis in cells responsible for laying down collagen leads these cells to try and compensate for their inability to put out intact collagen by producing larger quantities of imperfect collagen and/or non-collagenous protein. Ref: "Fluoride poisoning and the Effects of Collagen Biosynthesis of Osseous and Non-osseous Tissue," Toxicological European Research, Vol. 3, No.2, pp99-104, 1981.

1981 Gustavo Cisneros put on the International Advisory Board of Chase Manhattan Bank.

1981 Dr. John Emsley and co-workers at King's College in London find that fluoride reacts strongly with the bonds which maintain the normal shapes of proteins in the body. The work is subsequently confirmed by Dr. Steven Edwards and co-workers from the University of California in San Diego, and by Drs. Froede and Wilson from the University of Colorado at Boulder. By distorting the configuration of the body's own protein, the immune system attacks its own protein, resulting in an autoimmune or allergic response. Fluorides contribute to the development of an Acquired Immune Deficiency Syndrome, which is covered up by the media and medical community, which maintains a public focus on a viral cause for the problem, promoting the harmless HIV virus as the "cause" for "AIDS," covering up the pharMO-chemical sensitization of the population which has complex legal ramifications. 1981 Larez does a study that shows that fluorides are teratogenic (cancer-causing) in rats.

1981 Montauk III Time Travel Project (until 1983). Thousands allegedly sent ahead 200 to 300 years into the future. Alleged access gained to pyramid on Mars to turn off solar system defense network.

1981 Boston University establishes the Center for Adaptive Systems to further investigate Artificial Intelligence processes. The center is directed by Stephen Grossberg, graduate of Stanford. Grossberg also held positions at MIT and Rockefeller University. Grossberg would become head of a new department of cognitive and neural systems in 1988. The Center for Adaptive Systems would, with the help of Gail carpenter, Adaptive Resonance Theory (ART). ART would allow learning of new patterns without forgetting old ones, as well as the ability to accomplish fast-learning of new and unexpected patterns. In applications for which back-propagation would require 20,000 supervised training rounds, ART would accomplish in 5. It would incorporate "mismatch" and "reorientation" signals. It has been determined that ART represents at least one of the operations of the brain necessary for AI learning nets.

1981 At the headquarters of the Occupational Safety and Health Administration (OSHA), the director of the OSHA office of carcinogenic identification, Dr. Peter Infante, pointed out that a Current Intelligence Bulletin (CIB) on formaldehyde was "an important document assessing formaldehyde's cancer causing potential." The top bureaucracy at OSHA were embarrassed at the release of the truth, and tried to dismiss Infante. On July 27th, Infante writes Dr. John Higginson, director of the International Agency for Research on Cancer (IARC), disagreeing with the IARC decision to conceal the carcinogenic nature of the substance. Formaldehyde is a common component of vaccines.

1981 Britain conducts the National Childhood Encephalopathy Study and finds that there exists

a significant correlation between serious neurological illness and Pertussis vaccination occurring within 7 days of the shot. In the U. S., the FDA limits statistical data to 48 hours in order to conceal damaging data and eliminate data on deaths and damage occurring after that period of time. 1981 Japan begins use of a new childhood Pertussis vaccine, recommended to be given as 4th and 5th dose. U. S. vaccine used for 1st, 2nd, and 3rd doses.

1981 Dr. Robert Clark from the Boston University Medical Center shows that fluorides (as in fluoridated water supplies, toothpaste, etc.) stimulate granule formation and oxygen consumption in white blood cells when they were not challenged with a foreign agent, but inhibited these processes when the white blood cell needed them to fight off foreign agents. Ref: "Neutrophil Iodination Reaction Induced by Fluoride: Implications for Degranulation and Metabolic Activation" Blood, Vol. 57, pp 913-921, 1981.

1981 Approximate beginning of period where, according to Julianne McKinney, director of the Electronic Surveillance Project of the Association of National Security Alumni (1994), mind control technology begins to fall into the hands of Satanically based techno-cults, much of which is based on the experiments conducted at CIA headquarters in Langley by Dr. Stephen Aldrich, a patron of occult research. (1980's and 1990's, specifically). (See 1962).

1981 On July 18, 1981, NBC Magazine with David Brinkley revealed that the northwestern United States has been continuously bombarded by the U.S.S.R with low frequency waves set at the approximate level of biological frequencies; Brinkley: "the Russian government is known to be trying to change human behavior by external electronic influences."

1982 34th Meeting of the American Academy of Neurology releases a study which is published in Neurology magazine indicating that out of 103 infants who die of Sudden Infant Death Syndrome (SIDS), 66% had been vaccinated with DPT prior to death. Of these, 6.5% died within 12 hours of vaccination, 13% within 24 hours, 26% within 3 days, 37% died within 1 week, 61% died within 2 weeks, and 70% had died within 3 weeks. It was also found that SIDS frequencies have a bimodal peak occurrence at 2 and 4 months of age - the same ages when initial doses of DPT are administered to infants. Study done at the University School of Medicine at Reno, Nevada. Dr. William Torch.

1982 Study by Geschwind and Behan on Autism reveals the finding of an association between autism, celiac disease, dyslexia, stuttering, migraine headaches, developmental disabilities and left-handedness (all features of post encephalitic syndrome). The study caused a sensation because of scientific inability to imagine the connecting thread among the disparate conditions. The connecting thread is the childhood vaccination program.

1982 The U. S. Public Health Service conducts its first group of studies on animal cancer and fluorides, mandated by the 1977 Congressional Hearings. The study lasts until 1984, and then is scrapped because of flaws in design and progress. (See 1985, Batelle Memorial Institute).

1982 The Pakistani government expels a U. S. physician working at the Lahore U.S. chemical biological warfare lab after Soviets charge that experiments are being done there to infect mosquitoes with yellow fever and dengue for use in neighboring Afghanistan or Cuba. 1982 Peter Wilkinson at the University of Glasgow testifies before the Scottish High Court in Edinburgh in a legal case entitled "Inhibition of the Immune System with Low levels of Fluoride" which revealed that fluoride decreases the migration rate of human white blood cells. At a concentration of .2 ppm (which is .8 ppm below the "approved" level of 1 ppm), relative white cell migration rate is reduced 8%. A concentration of 1 ppm would produce a physiological decline of around 10%. Fluoride added to water supplies, tooth paste, school dental washes, supplement pills, and dentists visits are increased and promoted, contributing to a further co-factor in the decline of the immune capability of the population.

At this point, right wing military doctors are drawn to electronic mind control as a solution to the "useless eaters" quandary. In the introduction to the article, Schefflin states that "research designed to explicitly control the thoughts and conduct of citizens is in 1982 not only a reality, but the evidence is clear that this research is growing in scope, intensity, and financing."

1982 In Science magazine, Vol. 217 p.26-32, Dr. Dennis Leverett of the University of Rochester states, "if there are increasing concentrations of fluoride in the food chain, particularly food for infants, then we should expect fluorosis to be increasing in the population as well. The widespread use of fluorides might have created a situation in which we are approaching a critical mass of fluoride in the environment. There needs to extensive research done." Later in 1983 he would contradict himself at the University of Michigan symposium.

Part of the patent reads, "this invention provides the ability to put unprecedented amounts of power in the atmosphere at strategic locations and to maintain the power injection level, particularly if random pulsing is employed" and "by knowing the frequencies employed in this invention, a third party can sustain a communications network while the rest of the world's communications are interrupted," and "could be employed to pick up signals of others for intelligence purposes."

1987 Swedish Health Board declares amalgam to be toxic and unsuitable as a dental filling material.

1987 William Bise had the only article published on the behavioral effect of microwaves that is accepted by the “establishment” scientific community. Together with Elizabeth Raucher, Bise created an amazing demonstration that was video taped and nationally televised on October of 1987. Although nine hours of video tape was taken, only four minutes made it on the air. Four years went into their unfunded work, and the results speak for themselves. They had 300 human subjects that were tested under clinical conditions. Over 85% of them showed a repeatable response between an externally generated magnetic field and EEG brainwaves. Three male subjects were exposed to specific electronic patterns, such as spike waves, sawtooth waves, lissijous patterns, complex patterns like square waves with pulses, etc. In all cases they were correctly identified. This is not a statistical process. There was a medical doctor present in many cases. In one case, the doctor was supposed to be somebody from Army Intelligence, who said, “wow, this is really interesting.” They never heard from him again. The EEG documentation clearly showed pattern shifts associated with each change in waveform. There were distinct signatures present in the brainwaves when the input magnetic field was shifted. The induction of line images into the human brain from a distance is publically proven.

Local reactions are common after administration of DTP, occurring in 35-50% of recipients. Febrile reactions are more likely to occur in those who have experienced such responses after prior doses.”

1988 A Swedish study finds that mammograms and early detection of breast cancer did not

reduce the rate of death. Dr. Lars Janzon studied 42,000 women before concluding in an October 1988 British Medical Journal that mammograms should be restricted. When the Wall Street Journal in the U.S. informs an official of the American Cancer Society of the report, the official dismisses it.

Bush campaign co-chairman Jerome Bentrar admits to having assisted hundreds of Nazis to emigrate to the United States. Bush quickly instituted a policy of not releasing the roster of his “ethnic outreach group” available any longer.

1988 Medical Tribune publishes article “Brain Autoantibodies in 33% of Schizophrenics” which indicates that 33% of schizophrenia cases appear to be autoimmune in nature.”

1988 Battelle Memorial Institute releases its studies on fluorides and animal cancer for the U.S.PHS which, ironically, report highly specific fluoride-related cancers. The data is turned over to the National Toxicology Program (NTP), who gives the data to the Experimental Pathology Labs, who reclassify and delete items damaging to the pro-fluoridation faction. The altered data is then submitted to the “pathology working group” on December 6, 1989, after a year of reworking. All this with the full knowledge of EPA and U.S.PHS. (See 1990).

The project additionally “analyzed the capacity of each state in the U.S. to provide standard data on U.S. students, school staff, revenues and expenditures.”

1988 Researchers at the Argonne National Laboratory discover that fluoride promotes and enhances the carcinogenicity of other cancer-causing chemicals in the food and environment. Interestingly, this work confirmed studies sponsored by the United States National Cancer Institute conducted back in 1963 by Herskowitz and Norton at Saint Louis University. More than 30 years ago, these scientists showed that low levels of fluoride increased the incidence of melanotic tumors in living organisms from 12 to 100% - often these tumors were induced by fluoride over a period of days. These studies were further amplified by work done by the Taylor’s at the University of Texas which found that 1 ppm fluoride in drinking water increased tumor growth rate in mice by 25%.

1988 Penthouse Magazine, August 1988, details seven scientists murdered in Britain who worked on Star Wars (cover for EM Mind Control) projects at Marconi. Eventually, more than 22 British scientists working on related programs would commit suicide in bizarre ways. Another company who had scientists die was Plessey Defense Systems. Nearly all the scientists who died held electronics or computer related contracts with the British Ministry of Defence academies. The British government blamed the deaths on “stress.”

Dr. Thomas Clarkson and Dr. John Hursh of the University of Rochester, School of Medicine, Department of Toxicology, and Dr. Magnus Nylander and Dr. Lars Friberg of the Karolinska Institute of Stockholm, Sweden, concluded from their research that “the release of mercury from dental amalgam makes the predominant contribution to human exposure to inorganic mercury, including mercury vapor in the general population.” Over 100 million people have amalgam implants.

1989 Washington Post article, Feb. 17, "Bank Killer Tormented by Voices." The subject was Emmanuel Tsegaye, an Ethiopian bank teller, who became "depressed and suicidal," killing three bank employees in Bethesda, Maryland. Tsegaye was described as "attempting suicide several times" and was institutionalized more than once at St. Elizabeth's Hospital, well known for its involvement with CIA psychiatric programs. microns in size found in each liter of unpolluted sea water. (Aug. 10, 1989). Size equivalent to Naessens "somatids." Is this the reason fish cannot live in synthetic sea water unless 2 oz. of real sea water is added?

1989 In 1989, Dr. Yiamouyiannis used the Freedom of Information Act to obtain carcinogenicity studies conducted by Proctor and Gamble (one of the makers of fluoridated toothpaste) that were submitted to (and covered up by) the United States Public Health Service. These studies showed dose dependent cell abnormalities caused by fluoride. These results were reported in the February 22,

1990 issue of the Medical Tribune. Additional studies by Proctor and Gamble scientists confirmed the link between oral precancerous growth and fluoride, as well as an increase in osteomas (bone tumors) and osteosarcomas (bone cancer). In fact, the National Cancer Institute found in 1991 that the incidence of bone cancer was 50% higher in men ages 0-19 years of age exposed to fluoridated water compared to those who were not.

1989 Gordon Thomas publishes "Journey into Madness: The True Story of Secret CIA Mind Control and Medical Abuse."

1989 On February 23, 1989, Battelle released the results of its study of fluorides on mice. A most curious result of the study, from the U.S.PHS point of view, was that fluoride induced the occurrence of an extremely rare form of liver cancer, called hepatocholangio carcinoma, in fluoride-treated male and female mice. Two months later in April of 1989, Battelle released the results of its study of fluorides and rats. The study showed a dose-dependent relationship

between the incidence of oral cancerous tumors and fluorides. It is interesting to note that mice and rats yielded different The results with fluoride—different types of cancer. As a response to the Battelle study, the National Cancer Institute from examined the incidence of oral cancer in fluoridated and non-fluoridated countries over the period from 1973 to 1987. The National Cancer Institute study found that as exposure to fluoridation increases, so does the incidence of oral cancer; sometimes as much as a 50% increase in oral cancer rates occur in fluoridated areas—this translates to 8,000 new cases of oral and pharyngeal cancer per year, needless pain and suffering and a financial windfall to the medical and pharmaceutical factions that concern themselves with treatment.

1989 Magnetometers at Corralitos, California, detect unusual ULF waves (.01 to 10 Hz) on September 12, 1989. The waves increased 30x in strength by Oct. 5, 1989, and then weakened. At 2 pm on October 17th, the signals grew to the point where they went off the scale. Within 3 hours, the 7.1 Loma Prieta quake struck. The epicenter was 4 miles from Corralitos.

1990 The American Dental Association issues a Press Release which states “water fluoridation remains the safest, most effective, and most economical public health measure to reduce tooth decay.”

1990 The National Toxicology Program in February 1990 releases its pathological data tables with a cover letter which, in a turnabout, claims “there has not been any evidence that shows a relationship between fluoridation and cancer or any other diseases in humans,” and “water fluoridation has proven highly effective in improving the nation’s dental health by markedly reducing tooth decay.” The NTP final report, issued in March, omitted all studies which showed genetic damage from fluorides, and important studies showing that fluorides induce tumors and cancers were ignored. Kraybill, head of the NTP study, becomes a consultant to the American Council of Science and Health (ACSH), who threatens to sue the EPA if it “tries to undermine public confidence in fluoride.”

1990 The American Dental Association's ADA News reports that Procter and Gamble (who make fluoride-based toothpaste) has "unpublished findings" which "refute the carcinogenicity of fluoride." Procter and Gamble in March 1990 publish their paper on fluoride and bone cancer (rats) and leave out their data on mice. The rat studies confirm an earlier study that proved that fluorides in food resulted in precancerous growth in the mouth. In contradiction to their own results, P&G declares that fluoride "does not cause precancerous or cancerous changes."

1990 William J. Clinton runs reelection in Arkansas and barely wins. He then declares his objective to bring his circle of power to Washington D.C. as president of the United States. 1990 Supreme Court (April 17, 1990) rules that religious freedom is not a right - as guaranteed under the Constitution - but a privilege to be enjoyed at the pleasure of the government. This legislation corrected in 1993 with the Religious Freedom Restoration Act, signed by Clinton.

1990 CBS 60 Minutes program on mercury amalgam dangers (Dec. 16) caused the ADA to slightly modify its position. The National Institute for Dental Research subsequently issued a

position paper calling for “a gradual phase-out” of mercury amalgams, in favor of “far less toxic” composite materials to be developed.” (Note: Less toxic? How about non-toxic?)

1990 FDA Conference on Diagnostic and Therapeutic Uses Of The Electromagnetic Spectrum (May 1990).

1990 The Great Banking and S&L Scandal, after U.S. banking system is progressively looted for black budget project money between 1980 and 1990 under the Bush and Reagan administrations and the CIA.

1990 Project RF Media in Boulder, Colorado, using mind control subliminals over television carrier waves.

1990 The U.S. Public Health Service Immunization Practices Advisory Committee (ACIP) and the American Academy of Pediatrics considers high-pitched screaming after a Pertussis (DPT) vaccination an absolute contraindication to further Pertussis vaccine.

1990 Pediatric neurologist Dr. John H. Menkes, professor emeritus at UCLA, reports on 46 children experiencing neurological adverse reaction within 72 hours of a DPT shot. Over 87% of the children reacted with a seizure, 2 children died and most surviving children became retarded, with 72% having uncontrollable seizure disorders. Menkes conclude, “Pertussis vaccine encephalopathy (brain damage) is not a myth but rather a serious complication of immunization.”

1990 Project Tower, CIA, and Office of Naval Research step up electronic behavior control efforts through cellular telephone systems, which resonate at a harmonic of the humans skull.

1990 A study by Dr. John Yiamouyiannis on 39,000 school children contradicts any alleged benefits from the use of sodium fluorides.

1990 Dr. John Colquhoun in New Zealand is forced into early requirement in New Zealand after he conducts a study on 60,000 school children and finds no difference in tooth decay between fluoridated and unfluoridated areas. He additionally finds that a substantial number of children in fluoridated areas suffered from dental fluorosis. He makes the study public.

1990 U.S. House of Representatives introduced HR 4079 (Gingrich/Gramm), which declares a National Drug and Crime Emergency beginning on the date of the enactment and lasting 5 years. The bill provides for the arrest of large numbers of people, incarceration in forced labor camps, suspension of “perceived Constitutional rights,” and no provision for humane housing and treatment. Assets would become bounty. Usual laws relative to search and seizure would be suspended for this five year period. All limitations on drug testing of individuals (except the President and Congress) would be removed. The bill targets drug traffickers and violent criminals. The effect of the bill would be to create a subsociety of mind controlled drones.

1990 La Prensa Dominical, a newspaper in Honduras (Jul. 22) reports that police in El Salvador had uncovered a child smuggling ring that was buying children for resale in the U.S., noting that 20,000 children per year vanish in Mexico. Many children are used as sources for organ transplants.

1990 New York Dental License Board removes license from Dentist Joel Berger for removing mercury amalgam fillings from a woman in 1984 in order to encourage remission of her rheumatoid arthritis.

1990 The Los Angeles Times on October 10th publishes an article "Brain Cancer on Rise in Elderly," noting that "brain cancer has increased 500% among elderly Americans." And "it was once considered that brain tumors reached a peak rate in people in their '30s, and then would rapidly decline, but it now appears that the incidence continues to increase with age."

1990 In December of 1990, a federal regulation was adopted permitting the FDA to circumvent U.S. and International laws forbidding medical experimentation on unwilling subjects. This regulation permits the FDA to inject American military with unapproved experimental drugs or vaccines without informed consent. The FDA merely needs to deem it "not feasible" to obtain the soldiers permission. See Health Letter, Washington, DC. Public Citizens Health Research Group "400,000 Human Guinea Pigs in the Persian Gulf," Feb. 12, 1991. See 1991 Gulf War Entry.

1990 Approximate time period where Dr. Michael Aquino, a colonel in U.S. Army Intelligence, is leader of a Church of Satan spinoff named the Temple of Set. Aquino is an expert in military mind control, and has expounded on what he terms LBM (Lesser Black Magic) used in the control of populations, including psychological operations and conventional forms of terrorism. He was investigated by military and civilian authorities on claims of child sexual abuse at San Francisco's Presidio military base. It is also curious that today, Mikhail Gorbachev, "ex" Russian KGB, has his office at the same Presidio facility. The Presidio is home for the Gorbachev Institute, where Mikhail writes books and does U.S. government planning for military base closures. Dr./Colonel Aquino has written on his theories of mind control in an article which he submitted to the Washington Military Review, titled "From PSYOP to MINDWAR: The Psychology of Victory," essentially a work on the usage of psychotronic (physiological-electronic) techniques, citing in particular the usage of air ionization alteration. (See 1994 HAARP)

1991 NATO Advanced Research Workshop in the Coherent and Emergent Phenomena on Bio-Molecular Systems is conducted at the University of Arizona (Jan. 15-19, 1991). One of the papers presented by Harlan E. Girard is "Effects of Gigahertz Radiation on the Human Nervous System: Recent Developments in the Technology of Political Control." Girard reports on haphazard testing of EMR "nonlethal" effect weapon systems as having a principle feature of producing "auditory effects and visual

hallucinations.” Girard describes the visual hallucinations induced “as having the quality of 35mm slides.” According to Girard, the equipment “can be used to block all sensation.” He concludes with the consideration that long range mind control is “truly Satanic.”

1991 The U.S. Senate adopts a resolution calling for the CIA to reveal its budget to Congress. The resolution is dropped.

1991 Operation Desert Storm. Bush stops war after 100 hours at preserve Iraq as a threat. American troops are given experimental vaccines against biological agents. Within months thousands of troops sicken with communicable cancer causing virus. Disease deemed “Gulf War Syndrome.” Government denies responsibility. Over 8,000 troops were vaccinated with Botulism, over 150,000 troops were given anthrax vaccine, and all 500,000 troops were given Pyristigimine, an experimental nerve agent. All drugs were experimental.

1991 New York Times, Mar 17th, 1991 “U.S. Vaccine Plan Uses Welfare Offices” indicates the Federal government has considered denying welfare and nutritional benefits to families who refuse vaccinations.

1991 Collapse of BCCI international bank, after involvement with drug money laundering becomes apparent.

1991 The U.S. Public Health Service Advisory Committee on Immunization Practices (ACIP) drafts new guidelines which eliminate most contraindications to Pertussis vaccine. Essentially, this results in a denial or coverup of most reactions on the grounds that “there is no proof the vaccine causes brain damage.” They base their position on several studies financed by vaccine manufacturers conducted in the late 1980’s by vaccine policy makers such as Dr. James Cherry and Dr. Edward Mortimer, who sit on the ACIP Committee and are also paid consultants to U.S. Pertussis vaccine manufacturers, resulting in biased and flawed studies in order to prove “no cause and effect” between the Pertussis vaccine and permanent brain damage. U.S. vaccine policy makers are the CDC and the American Academy of Pediatrics. All this, despite decades of experience indicating the opposite conclusion. (Note: This policy constitutes criminal neglect, racketeering and conspiracy).

1991 Carl Campbell strolls to a Pentagon bus stop and shoots Navy Commander Edward Higgins, arms control specialist for the Department of Defense. The man, taken into custody, claimed the CIA had “injected him with a microchip that controls his mind.”

1991 The “conjugated” Hib vaccine introduced in 1988 is extended for use in infants as young as two months. It becomes mandated in 44 states in the U.S.

1991 Cobden Club Document distributed during Eco-Conference preplanning advises members that nations must establish quotas for reducing existing population.

1991 The Environmental Protection Agency (EPA) again engages ICAIR Life Systems to perform a literature search on fluorides. A researcher for ICAIR, Dr. John Beaver, admits that he was instructed to select only certain reports and ignore others. The final series of reports

was sent to EPA, who forwards them to the Subcommittee on Risk Assessment of Ingested Fluoride of the National Academy of Sciences as an “independent” report. Five out of eight members of the Subcommittee are historically profluoridation.

1991 Jean Claude Pecker, Frances leading astronomer and former director of the Institute of Astrophysics in Paris, speaks at a symposium sponsored by the Royal Society of Canada. He asserts that mass sterilization in poor countries might be the only way to curb population, and that it would be necessary within 50 years. Planned Parenthood in Canada strongly rejected the idea of forced sterilization in favor of raising living standards and education.

1991 The United Nations Population Fund, managed by William Draper III, asserts that 254 million couples will be surgically sterilized in the course of the 1990's, and that if present trends continue, 80% of women in Puerto Rico and Panama will be sterilized. Mexico is high on the list of targeted nations for population control.

1991 New York Times (8/9/91) article describes the possible cause of the slowdown in Earth's rotation (1988/1990) as an influence on the ELF level affecting core flow through magnetic induction.

1991 Second Immunization Conference in Canberra, Australia. Dr. Viera Scheibnerova reports that “vaccination is the single most prevalent and most preventable cause of infant deaths.”

1991 Diane Sawyer does report on ABC about Burroughs Wellcome AZT tests on Romanian babies. FLV.23A is a reagent oxidative catalyst, as AZT is toxic to humans and destroys the immune system.

1991 The U.S. Public Health Service recommends a child receive the first DPT shot at two months of age, with subsequent shots given at 4, 6, and 18 months, and between the ages of 4 and 6. At the same time, Europe, Sweden and several other countries routinely “wait” until after 6 months of age “because of the improved antibody response in babies whose immune systems are more developed.”

1991 Annual Conference of the Society of Homeopaths, Manchester, England, September 91, Richard Moskowitz, M.D. Revelation that the English National Health Service pays a “bonus” to doctors with documented vaccination rates above SPECIFIED averages.

1992 Lancet, Journal of the British Medical Association, reports (3/7/92) that the oral polio vaccine used in the mid 1970's to treat recurrent herpes was contaminated with a number of potentially dangerous retroviruses, and may have seeded HIV among Americans.”

1992 Temple of Set leader Lt. Michael Aquino travels to Wewelsburg castle in Germany and holds a magical ceremony in the Hall of the Dead, considered in World War II by Heinrich Himmler to be the place to summon the great powers of darkness and the focus today of the Order of the Trapezoid.

1992 Japanese embark on an Artificial Intelligence effort called the Sixth Generation Project, also known as the Real-World Computing Project, whose stated goal is to achieve human brain-like computing by 2002. The Japanese government has already committed \$500 million, and industry could inject billions more. Computer maker Fujitsu alone spends \$2 billion per year on research. Japanese research is moving away from using silicon to using biological approaches. Kyushu Institute of Technology has fashioned a set of neuron-like switches based on biological chemicals known as a “cyclic enzyme system,” employed in living organisms to regulate biological processes.

1992 U.S. agencies test mass telephonic wiretapping equipment in six major cities, which would eventually manifest in the Wiretap Access Bill passed by Congress in 1994.

1992 The riots in Los Angeles (April 29, 1992) take place simultaneously with mind control projects High Tone and Xeno, which test human frequency operations and frequency wave manipulation techniques, many of which utilize cellular telephone frequencies which initiate a variety of physical and psychological effects. The riot is supplemented by “sleepers” and agency plants that ignite many of the structural fires in the city. Ships with unusual antennae are spotted in the Pacific adjacent to Los Angeles for three days prior to the outbreak of violence, along with Triad type black helicopter overflights.

1992 The “Cult Awareness Network” (CAN) conducts more than 1800 operations involving deprogramming, for which payment varied between \$5000 and \$20000 each. CAN began as the “Citizens Freedom Network,” founded in 1974 by Dr. L. J. West (UCLA mind control), Margaret Singer, and R.J. Lifton. The CFN changed its name to the CAN in 1985/86.

1992 Highly secretive, quasi-independent elements within the U.S. intelligence community, primarily the CIA, along with BCCI and laundered profits from drug and gun trafficking, back Arkansas’ Bill Clinton for President.

1992 In Britain, molecular biologist Peter Duesberg publishes a 76-page article in *Pharmacology and Therapeutics* (Vol55), in which he systematically takes apart the theory that AIDS is caused “by an infectious virus” and that “HIV” is capable of the wholesale destruction claimed. Robert Gallo and others base their theory of the HIV-AIDS link on purely circumstantial evidence: that this virus is present in some people who have a general immune dysfunction. Duesberg quotes statistics presented by the Institute of Medicine which shows that no more than 50% of American AIDS patients have antibodies against HIV present in their systems. According to Duesberg, “twenty-five previously unknown and in part unrelated diseases have been redefined as “AIDS,” provided they occur in the presence of HIV.”

1992 The U.S. Centers for Disease Control (CDC) admits cases exist where there is T-Cell depletion in persons without the presence of the “HIV” virus. The admission is in the September 9, 1992 issue of the *Journal of the American Medical Association* (JAMA).

1992 Vancouver Sun (1/25/92) reports University of California chief neurosurgeon Ronald Young as saying that a way has been found to focus ultrasonic waves so precisely that a beam can be directed into a living brain and halt the activity of clusters of neurons. (UCAL Irvine).

Neurons can be stunned or killed with a higher power level, according to Young.

1992 U.S. National Academy of Sciences (NAS) and the Royal Society of London issue a joint statement calling for more rapid stabilization of the population. Entitled "Population Growth, Resource Consumption and a Sustainable World," the statement endorses the Malthusian paradigm, which says that (1) the planet can only support a certain finite population, and (2) that human population growth in itself destroys the environment. (Iron Mountain application as external threat to replace war - possibility).

1992 Vil Mirzayanov, scientist with a 26-year background in Soviet chemical weapons programs, is jailed for revealing Soviet continuation of chemical weapons program. Jailed again for the same reason in 1994. Mirzayanov smuggled out information about the program that was published in the May 26, 1994 Wall Street Journal, which states that "the greatest results in the Soviet chemical weapons program were achieved between 1985 and 1991. Because the military disguises production of binary chemical weapons as use of "agricultural chemicals" and the West does not know the formula for the new weapons, inspectors under the Chemical Weapons Treaty cannot identify the components." Apparently the Russians secured loopholes in the Treaty which allow it superiority in chemical weapons because the prohibited substances do not include those known in Russia as "substance A-230, Substance A-232, Substance A-233, etc.

1992 American Journal of Epidemiology reports that children die at a rate 8x greater than normal within three days of receiving a DPT shot.

Reported events number far less than actual events, so number is actually larger, perhaps 170,000 or more.

1992 Estimates of U.S. illicit drug consumption \$150 billion, partially used as rationale to imprison citizens on minor possession and establish draconian policies.

1992 Michael Perrone, a legislative assistant in New Jersey, contacts the FDA requesting all information regarding the safety and effectiveness of fluoride tablets and drops. After 6 months of stalling, the FDA admitted they had no data to show that fluoride tablets or drops were either safe or effective. They informed Perrone that they will “probably have to pull the tablets and drops off the market.” 1992 From 1988 to 1992, over \$249 million has already been awarded due to hundreds of deaths and injuries caused by mandated vaccines. Thousands of cases are still pending. The permanent injuries from vaccines include, but are not limited to, learning disabilities, seizure disorders, mental retardation, and paralysis. Many of the awards for pertussis vaccine deaths were initially (and wrongfully) misclassified as Sudden Death Syndrome (SIDS).

1992 Clinton Administration legislation proposes a National Police Force.

1992 Discovery Magazine (5/92) discusses the fact that disruption of the Earth’s internal dynamo and the alteration of upper atmosphere magnetic belts (See HAARP, 1994) can “create a premature reversal of the magnetic poles, worsen the newly discovered wobble of the Earth, and possibly create a total polar reversal or Earth shift. During at least one reversal, magnetic north may have changed direction by as much as 4 to 8 degrees in a single day.”

1992 U.S. government decides to award process patent rights for all transgenic (genetically engineered) cotton to American biotechnology company (Agracetus), on behalf of chemical and nuclear multinational W. R. Grace; Europe has also granted them the patent. The patents will give the company a planetary monopoly on any new varieties of cotton. All cotton producing countries will pay royalties to use the seeds, and growers worldwide will be forced to return to aerial spraying of cotton resistant to chemical herbicides, which allows continued environmental contamination.

1992 Estimated that 11.2 million in U.S. use illicit drugs.

1992 Centers for Disease Control (CDC) reports that 87% of all cases of polio in the United States between 1973 and 1983 were caused by the vaccine. The CDC also said that every case from 1980 to 1989 was cause by vaccine.

1993 Royal Swedish Academy of Science holds an international conference to discuss issues of population growth, development, and the environment.

1993 More than 25 percent of all measles cases are occurring in babies under a year old. CDC attributes this to growing number of mothers vaccinated between 1960 and 1980. When natural immunity is denied by vaccination, measles immunity cannot be passed on to babies.

1993 Dr. Robert Gallo, “co-discoverer of HIV” reveals in the June issue of Bio Tech that the protein “p24,” which is generally accepted to be the proof of HIV existence, is in fact found in all retroviruses that live in the body and do no harm. It is not unique to “HIV” retrovirus. The detection of “p24” is the basis for the ELISA test. A study published in the New England Journal of Medicine (1988 V318,p448-9) revealed that antibodies to p24 were detected in one out of every 150 people.

1993 Arms sales to the Third World drop 20% to \$23.9 billion from \$28.6 billion in 1991. Third year in a row the U.S. is the largest weapons broker to the Third World. Ironically, the U.S. warns China about arms exports (July 93).

1993 Associated Press (9/1/93) announces that five volunteers at the National Institutes of Health have died from an experimental drug touted as a "miracle cure" for hepatitis B. Drug:

Fialuridine (FIAU). NIH Dr. Jay Hoofnagle “fears other toxic antiviral drugs as AZT and DDL may attack patients the way FIAU did.” The article revealed that Dr. Raymond Schinazi of Emory University found in 1986 that FIAU, under certain conditions, would metabolize into a very toxic compound. FIAU causes cells to produce flawed mitochondria and DNA.

1993 CDC announces that smoking causes 22% of all cases of myeloid leukemia.

1993 The U.S. Army directs Walter Reed Army Institute of Research to sign an agreement with Micro-GeneSys in Meridan, Connecticut, for a “large scale clinical evaluation” of an AIDS vaccine designed to block destruction of the immune system. The VaxSyn vaccine uses a genetically engineered protein that matches a protein called (gp160) that covers the surface of the HIV virus. (Note: That the HIV virus is harmless and does not “cause AIDS” is known, illustrating that the military is in on the AIDS scam). See Duesberg material.

1993 Julianne McKinney from the Association of National Security Alumni, states that in the 1980’s federal mind control experiments began to heavily involve the use of children in ritual abuse, psychotronics, and eugenics. Apparently, the wave of ritual child abuse allegations that swept the country in the 1980s cloaked federal psychotronic and eugenics experiments in young children, involving institutions like the UCLA Neuropsychiatric Institute. The term “screen memories” (See Matrix II), or “False Memory Syndrome,” is a scapegoat negating the believability and viability of more than 12,000 citizens who have put through this procedure. Experiments with psychotronics continue to be disguised, while Nazi inspired doctors implant biometric tracking devices into nasal cavities and ear canals. Brain transmitters can be tracked by Global Positioning Satellites.

The Canadians also routinely black out U.S. television signals with “offending stories.”

1993 Cellular industry pays for and receives a study which deems cellular phones to be safe. University of Utah, Dr. Om Gandhi. According to the editor of Microwave News, the results of the study do not support this assertion. 1993 Planned Parenthood announces “condoms for females” in order “to protect against AIDS.” (Note: Since AIDS is a scam, it is seen as population control in disguise).

1993 Associated Press releases article on August 18, 1993 claiming “no health risk for fluoridated water,” as stated by the National Research Council and Dr. Bernard M. Wagner from the New York University School of Medicine. A statement that “132 million Americans drink water with .7 ppm fluoride.”

Some in Los Angeles reported hearing strong “sonic booms” prior to the quake. Sonic booms often precede Tesla induced events. (Early Warning Earthquake Network at San Jose, Jack Coles).

1994 W. R. Grace and company, through Agracetus was granted a patent to transgenic soybeans - the first attempt to gain world control of a staple food crop. The soybean industry is worth \$27 billion annually worldwide.

1994 The Soviets hold a May 1994 conference where they prepare a tightly coordinated plan to take power. Socialism and Communism is described as the future of mankind. A restoration of the Soviet Union is called for. It is expected that former Russian Vice President Rutskoi will gain power in Moscow, and take control of Russia’s powerful new biological, chemical and

electromagnetic weapons.

1994 University of North Carolina finds that women employed in electrical trades are 38% more likely to die of breast cancer. For men, the risk of breast cancer in those occupations is six times normal.

1994 In the United States (Aug. 94) a program begins in the mind control arena which involves the use of scalar energy and photonic information fields, to last until December 1994.

1994 The Sunday Times in London (May 22, 1994) reports that the Western Blot “HIV” test gave a positive result to some 85% of African patients found to be “HIV” negative. Proteins from the leprosy germ, which infects millions in Africa, can show up as a false positive for “HIV” (detected by p24 protein presence).

1994 An emergency room doctor in Riverside, California, overcome by mysterious fumes while examining a dying woman files a \$6 million lawsuit, claiming she caught a blood disease that ate away her bones. The blood of the victim had an ammonia smell and contained unusual white and yellow crystals. The emergency room doctor reveals she woke up with muscle spasms, numbness, and shortness of breath after passing out in the emergency room.

1994 The government of Australia spends A\$120 million funding biotechnology, A\$30 million of which goes to the Commonwealth Scientific and Industrial Research Organization (CSIRO), which has researched transgenetics and seed genetics since the early 1970's. Australia was the first country to use recombinant DNA biopesticides. Note: A dangerous development in transgenic research is the development of plant species resistant to toxic chemical pesticides—permitting the poisoning of the people, but maintaining the profit incentive to produce food. At the moment, \$6 billion is spent in the United States to achieve this objective. Perhaps worse is the transgenic research going on with animals, who are having human genes spliced into their DNA. (Proto-Atlantean research tendencies?).

1994 Dietary Supplement Health Education Act of 1994. Under the law, the FDA has its role narrowed relative to regulating the \$2.5 billion supplement industry. The law places the burden of proof on the FDA when it claims a product is unsafe (isn't that backwards?) Additionally, the law establishes a presidential commission to review health claims on products. The law requires advertisers to prove claims of cures or disease prevention, but permits claims about how vitamins (synthetic, yet) and supplements promote good health. Manufacturers are to refrain from advertising health claims for vitamins, mineral and herbal products and amino acids for 4 years. (1998).

1994 Science News reports that scientists are “now realizing” that certain chemical pollutants chemically mimic female hormone estrogen. The effect is that normal sexual development in human males is being affected. Testicular cancer has risen. Sperm count has dropped 50% in men over the last 40 years.

1994 Netherlands makes it a criminal act to use secret codes or words while using the telephone, under penalty of a 3-day disconnection and a - month prison sentence. (De

Volkskrant 3/26/94).

1994 The National Crime Bill is passed in the U.S.

1994 The U.S. Commission for Immigration Reform, headed by former U.S. Rep. Barbara Jordan, calls for a National Computer Database containing the names of every legal citizen or legal alien holding Social Security numbers or Green Cards. Jordan urges Clinton to order a pilot program to test methods of accessing such a database. The proposed registry received bipartisan support in Congress, but alarmed privacy experts. (Notice that that they are dealing with “a pilot program to test access,” automatically assuming that the registry is a done deal despite the lack of a national referendum).

1994 Tulsa World (1/11/94) revealed that Lawrence Livermore Laboratory has a secret 21 member “Project Woodpecker” team that just won a special award from the CIA and the National Security Agency.

1994 Bernard Eastlund (see 1987 on HAARP) reveals in the May-June issue of Microwave News, describes a “full, global shield of electrons created with RF transmitters.” (See also 1994 HAARP).

1994 Major conference in Hawaii, with drug agents from the U.S. and six other countries (Honolulu 9/ 94) meeting to “develop a plan that would stop international trafficking.”

1994 U.S. Senator Peter Domenici offers federal help in New Mexico in a state probe of animal mutilations. (U.S.A Today 9/21/94). (The same thing happened in the 1970’s, didn’t it?)
